*The content of this book is different to the first edition. The work is divided into 3 main parts. Part one, the major section of 120 pages, contains primarily profiles of oologists who have passed away since 'The Egg Collectors of Great Britain and Ireland' was published in 2000. However, in some instances, fundamental, particularly personal, information has subsequently come to light in respect of certain persons included in the original book and for these a decision had been made to include details in this part. Exceptionally, and it is unlikely that the editors will be involved in another update of this nature, it has been decided to include in this part profiles of two oologists still with us whom we consider to have particular important influence on the discipline, and therefore merit due recognition. Part 2 adds information on some of the collectors featured in the first edition which has come to light in more recent years. Finally, Part 3 provides some photographs not previously published of a number of oologists including, if known, details of the place taken, companions and date.*

In the early 1990s, George decided that given his age (approaching 90) that his collection would be better looked after by someone else and offered it up to Jim Whitaker. Jim took on the collection and helped to conserve it with the long term intention of passing it on to a Museum. In 1995, Jim's house was raided by West Yorkshire Police and the RSPB who confiscated the collection despite being legally held by Jim. A lengthy and costly court case ensued after which Jim was given back most of the collection.*
