### Catalogue No. 87

This catalogue comprises a large botanical section in which we have included an interesting cross-section of Herbals dating between the 16<sup>th</sup> and 19<sup>th</sup> centuries. The earliest of these works is a 2<sup>nd</sup> edition of Fuch's great herbal '*De Historia Stirpium Commentarii Insignes*' dated 1546. Nineteenth century works include a 2<sup>nd</sup> edition copy of William Meyrick's '*The New Family Herbal*' of 1890. Floras and botanical monographs also feature quite strongly in this catalogue.

Several works on Beetles are featured in the entomological section including two very good ex-public library sets of Fowler's '*The Coleoptera of the British Islands*'. One of which is the very scarce large paper edition which comprises 198 fine hand-coloured plates

Several of John Harvie-Brown's works can be found in natural history. His joint authored book '*A Vertebrate Fauna of Scotland. Shetland Islands*' is listed as item no.607, with the rest numbered consecutively from 632 to 637.

Published at the end October 2009. *Art of the New Naturalists*. A Complete History by Peter Marren and Robert Gillmor. RRP £60.00; our price to catalogue customers £54.00. See the last page of this catalogue for more details.

*The only autobiography of the distinguished naturalist, Derek Ratcliffe who died in 2006. Born in 1929, the book tells the tale of his life from boyhood, when his interest in birds, butterflies, moths and dragonflies started to develop, through to the period in his life before 1970. Ratcliffe took the opportunity presented by writing this book of paying tribute to some of the people who helped him along the way and became lifelong friends. Among his publications are the two books published by*

Poyser, namely 'The Peregrine' and 'Lapland'. He wrote 'Lakeland' in the New Naturalist Series and 'Birds of Mountain and Upland' published by Cambridge University Press. In his early life he worked as a Botanist in the Nature Conservancy Council and was editor of the Nature Conservancy Review published in 1977.

*In this book the author has brought together drawings from his sketch books and field notes from over twenty years of birdwatching in Britain and Ireland. He has also included more than 60 new paintings, which depict not only bird life but also the changing seasons and countryside of these islands. The birds shown in this book follow the Voous order from divers to buntings. Some of the birds are rarities, others are chance encounters but many are the result of weekly visits to Langford Lowfields and from observations made while working his Breeding Bird Survey square.*

882. Waydelin, F.J. *Adventures Among Birds*. 1st. Ed. Pub. James Whitaker (Peregrine Books). 2008 pp.xiv, 167 with some b/w. photography. Fine in fine dw. Limited to 100 copies. [37623] **£60.00**  
*Frederick J Waydelin, dedicated egg collector, came to write this book, completing it in a typed version in 1944; but it remained unpublished. He became interested in birdnesting as a schoolboy in the late 19th century. Over the following few years, he became increasingly interested in egg collecting. Waydelin was admitted to the British Ornithologists' Union in 1920, but his membership was shortlived, and his resignation in 1922 may well have been connected to his egg collecting exploits. Later in the mid 1930s he ceased egg collecting and rejoined the B.O.U. (1934), but again his membership was shortlived and he resigned for the second time in 1936. An interesting historical account.*

*The purpose of this book is to provide a comprehensive treatment of the ecology of aquatic insects to be used as a textbook at the advanced undergraduate and beginning graduate levels, and as a reference work by those studying aquatic habitats and their inhabitants.*
960. Warren, A. and French, J.R. *Habitat Conservation*. Managing the physical environment. Pub. Wiley. 2001 pp.x, 356 with b/w. photographs and figs. A vg. copy in card covers. [37741] **£25.00**  
*This book examines the relationship between habitat and ecosystem dynamics. It covers habitats ranging from mountains to floodplains to coastal dunes and rivers this text discusses how the biological and physical processes interact in each habitat, the current and future impact of global warming and case studies that demonstrate how different habitats can be naturally managed.*
961. Weygoldt, P. *The Biology of Pseudoscorpions*. Pub. Harvard University Press. 1969 pp.xiv, 145 with some photographs and figs. A vg. copy in similar dw. [37575] **£30.00**  
*This book is the first comprehensive treatment of the biology of pseudoscorpions. The author analyses their internal anatomy and physiology, locomotion and general behaviour, and reproduction development, including methods of sperm transfer and the unique qualities of embryology and brooding biology.*
962. Wheeler, A. *Key to the Fishes of Northern Europe*. Pub. Warne. 1978 pp.xix, 380 with line drawings and distribution maps. VG. [37574] **£50.00**  
*This is a comprehensive guide which describes more than 350 species and gives maps of their description. All freshwater fishes living between Ireland and the Iron Curtain, and from the Arctic to the Alps are included.*
963. Whitton, B.A. *River Ecology*. Studies in Ecology. Volume 2. Pub. Blackwell. 1975 pp.x, 725 with b/w. photographs and many figs. A vg. copy in slightly faded dw. [37391] **£20.00**  
*This book offers a comprehensive treatment of river ecology, and its prime aim is to provide a fundamental framework for the subject. Such an approach will be of value both to the more advanced student and to the research worker and river management officer who needs some guidance to the mass of literature which is now appearing about rivers.*

## **Art of the New Naturalists**

A Complete History

Peter Marren and Robert Gillmor

This book provides an interesting insight into the artwork used for the dust wrappers of the 'New Naturalists'. All of the books in what has now become the main series are covered up to and including title No.110 – Wildfowl. The 21 monographs are also reviewed in the same way. Peter Marren explored the Clifford and Rosemary Ellis archive, the couple who first began designing the dust wrappers, which has shone light on how the old covers were developed, approved and in some cases rejected. Robert Gillmor has now designed more than 30 dust wrappers and his approach to their design and creation is provided by the artist himself.
